Introducción

COORDINADOR DE ALMACENES

D48 - TEST DE DOMINÓS

Es un test que mide el factor G de la inteligencia. (Capacidad de inteligencia general) en función de sus facultades lógicas. Mide el C.I/ Facultades Lógicas.

Se hacen 48 preguntas (de ahí el nombre del test), las cuales deben ser contestadas en un periodo de entre treinta y sesenta minutos (no hay un límite de tiempo, aunque este debe ser especificado en el informe por el examinador) y puede ser aplicado en un espectro de personas entre 10 a 65 años. Es un test de inteligencia no verbal. Las fichas siguen un orden cíclico. Lo que hay que descubrir es el orden o la serie que siguen las fichas. La dificultad se va incrementando en cada pregunta.

Consta de 40 grupos de fichas (imágenes) y el objetivo es identificar una o más leyes que relacionan las partes superiores, inferiores o laterales de las fichas de dominó. Sus beneficios son que elimina las diferencias entre los sujetos causadas por factores sociales y educativos. Se le reconocen índices de validez y confiabilidad aceptables (r-0,79) con relación a otros tests de inteligencia y se aplica en multitud de países en Psicología Clínica, Educativa y del Trabajo.

Los resultados presentados en este reporte se basan en las respuestas del candidato que ha respondido a la evaluación desde el **2015-11-19 09:22:51** hasta el **2015-11-19 09:38:29**
